

halFILE 4.0

# Crystal Magic

---

# Designer Support

- Crystal 8.5
  - Crystal 9
  - Crystal X
  - Crystal XI
  - Crystal 2008
  - Crystal 2011
  
  - Recommendation: upgrade to Crystal 2011 but not required
-

---

# Runtime Support

- Crystal Reports for VS2010
    - Single and only supported runtime
    - Installs alongside any other version of Crystal
    - Included in workstation installer for 4.0
    - Does not include designer
-

---

# What's the magic?

- Automatic Conversion
    - halFILE 4.0 takes the designed version and converts it to Crystal Reports for VS2010
    - Original remains in tact for later modification with your designer version
    - New file <OriginalFilename>\_.NET.rpt
    - If you modify the original you will need to “reset” in halFILE so that it will be converted to the new format
-

---

# Enhancements

- Direct to PDF option
  - Reduced keystrokes to print report
  - Multiple reports on screen simultaneously
  - Form size and placement “memory”
  - No more conflicts with other software that use Crystal
  - No confusion over runtime versions
-

---

# Text search capability

---

---

# Live Demonstration

- Let's create a basic report from scratch !!
