

General Enhancements

1. Move to .NET Platform for better performance and stability.
2. halFILE integrated PDF Viewer.
3. halFILE integrated Office Viewer.
4. Crystal 2011 Support.
5. Switch to LDAP for halFILE AD Integration.

Index Module Enhancements

1. Add ALT+I or some keystroke to HFIndex32 to do the same copy field functionality as ALT+D but "insert" the data at the cursor position instead of replacing the data.
2. Add Auto Fill of # of pages.
3. Spell check option
4. Edit-Append from file that handles folders with periods.
5. Support date/time field and current date/time auto fill.
6. Option to press ctrl+s and no other key required to go to next doc in index and/or search
7. Hot key which, when used in M-E field will replicate the prior line's last name (left up to comma or space).
8. Support data thresholds on date or value fields including date range, value range, file date must be after instrument date.

Search Module Enhancements

1. "Not equal searches.
2. NULL searches.
3. OR Searches (Multi-Entry fields only).
4. Re-order search hit list columns by dragging columns to desired position.
5. Change hit list sorting to simple click in header box - toggle ascending/descending.
6. Make sure tools-options settings are immediate.
7. Hide the Find Text button unless halCOLD is configured.
8. Distinct name query where you can see all names in the database and then select the ones to search on.
9. Build search criteria by clicking on names in hit list.
10. Ability to do include/exclude of Instrument Types.
11. Show Record Counter statistic on hit list and document info screens so user knows how far down they are in the Search Results.
12. Edit-Append from file – handle folders with periods.
13. Allow % in block and lot so you can do a section search for all blks/lots

Base Edit Enhancements

1. Edit Block/Lot instead of having to clear and re-add... i.e. in the base edit, be able to fix a single error right there on the grid.

halFILE Manager Enhancements

1. Create Basket - prevent SQL reserved words for basket names.
2. Add interface to set up searchmenus.ini.
3. Re-vamp document level security so a user can belong to more than one group.
4. New icons – smaller footprint.

halFILE Administrator Enhancements

1. halFILE to be more aware of e.halFILE Users table.
2. Add MEFieldNums and DocDef utilities to ODBC Info Screen for more administrative control.
3. New icons.
4. Bring all security settings into a flatter interface.
 - a. After update, keep user list position instead of jumping to the top.
 - b. Include Extended Settings on Main Settings box.
 - c. Show Main settings on the main user screen so, as they add databases for the user, they can see the inherited privileges.
 - d. Put e.halFILE settings on User screen.
 - e. Look at SQL 2005 for ideas.
5. Add menu to Subdivision Combine utility (SubRollup.exe).
6. Control FromEmail= and SMTP Authentication settings in halweb.ini from Auto Archive set up.

Basket Status Enhancements

1. Handle baskets with over 32767 entries more gracefully.

halViewer Enhancements

1. Fix Edit-Delete Page where path includes a period.
2. If you are zoomed in and hit F11, it properly keeps zoom level. But after that, changing to a new document increases the zoom level.
3. Add page counter 1/5.
4. Create integrated viewer for Office and PDF documents.

Archive Enhancements

1. Add computer name at top of log so we will know where archive is scheduled.

Import Module Enhancements

1. Handle importing from multiple source folders - maybe temporary copy from all subfolders.
2. Use different file control so you can get to UNC paths more gracefully.
